06	System Architecture	8
07	Progress Tracking	9

01

Executive Overview

Phase 1 complete — autonomous agent system live

Mission: Build enterprise-grade AI consultancy delivering operational efficiency via autonomous agents.
Target clients: manufacturing, retail, and F&B; operations with legacy ERP pain points.

- Mission: Build enterprise-grade AI consultancy delivering operational efficiency via autonomous agents.
- Target Clients: Manufacturing, retail, F&B; operations with legacy ERP pain points.
- Budget Posture: Free-tier first (Nous Portal, OpenRouter, local LLMs); paid APIs require explicit approval.
- Technical Stack: Python 3.13 + ReportLab (PDF), pypdf (extraction), uv venv management.

02

Mentor Program

5 concepts mastered / 9 total

- Started 3x/day cadence (07:00/15:00/22:00 MYT)
- Completed: LLM fundamentals, agent workflows, guardrails, tool-use vs agentic
- Current Focus: Evals, confusion matrices, golden sets
- Mastery Level: 6/9 concepts mastered

Mentor Key Insight

Auto-switch to operational mode: mentor shipped golden_v1.csv scaffold instead of teasing next concept after detecting execution gap.

03

PENSOLAR Case Study

Solar project management automation

Domain: Solar energy project management in Malaysia

Pain Points: Manual permit tracking, crew scheduling conflicts

Solution: AI-driven anomaly flagging in existing ERP workflows

Key Insight: Start tool-use + routing before full autonomy

04

Marketing Engine

Daily cadence active

- Daily briefs Mon-Sat via marketing-advisor-daily cron
- Target Personas: Manufacturing Ops, Retail Store Managers, F&B; Kitchen Leads
- Channels: LinkedIn organic, landing page UVP, lead magnets
- Content Cadence: 3 posts/week case-driven storytelling

05

COO Strategy

Week 1 executed, W2 preview ready

- Week 1 Objectives: Legal entity setup, domain registration, bank account prep
- Budget: RM200 core (SSM + domain + survey), optional buffer RM45
- Risks: SSM name rejection, domain taken, free-tier throttling mitigated
- Success Metrics: 50+ LinkedIn followers, 3 quality posts, C5 scaffold running

06

System Architecture

5 crons pinned + autonomous recovery

- 5 active crons all pinned to tencent/hy3:free (nous)
- Skills auto-load via /opt/data/skills/PDF/ path injection
- Workspace cleanup auto-deletes files older than 14 days
- INDEX.md tracks all outputs with direct links
- Auto-backfill + pin enforcement on every restart

07

Progress Tracking

Mastery + milestones

Concept	Status	Score
LLM Fundamentals	Mastered	N/A
Agent Workflows	Mastered	N/A
Guardrails/RBAC	Mastered	N/A
Tool vs Agentic	Mastered	N/A
Confusion Matrix	Mastered	3/3
Golden Set Eval	Scaffold built	Pending audit
