

OAKAI SDN BHD

AI Solutions Provider Launch Plan

Comprehensive Execution Strategy

Document ID: OAKAI-PRP-2026-08-11

Classification: Confidential

Prepared by: Hermes Agent (COO-AI)

This document consolidates all autonomous streams into a single execution blueprint:

Company registration & business setup checklistTechnology infrastructure & security layersAI mentor program syllabus
(4x daily cadence)Marketing engine playbookProduct development roadmap

Execution begins immediately. All crons automated.

1. Company & Business Setup

Status: ■ Pending registration

1.1 Critical First Steps

- **Reserve company name** “OAKAI” via SSM e-Lodgement (1-2 days turnaround) → RM30
- **Incorporate company** (submit full docs) → RM120, ~3 working days
- **Open business bank account** (after SSM receipt) → required for invoicing
- **Register domain** oakai.com.my (available) via Exabytes → RM15/year
- **Provision cloud infrastructure** DigitalOcean/AWS VPS (~RM80/month)
- **Apply for business credit card** for ad spend and SaaS tools

1.2 Compliance & Identity

- **Business cards:** Print once bank account opened (not before)
- **SSM company stamp:** Order post-registration (RM25-50)
- **GST registration:** Triggered automatically at RM500K turnover

2. Technology Infrastructure

Security-first architecture with layered data isolation

2.1 Core Stack

FrontendReact + Tailwind CSS**Backend**FastAPI (Python)**Database**PostgreSQL + Redis cache**Auth System**Supabase
Auth (email + OAuth)**AI Layer**Local LLMs (Laguna-S) + Nous Portal API**Agent Orchestration**LangGraph workflows**Data Isolation**Vector DB per tenant

2.2 Security Layers

- **Network level:** VPC isolation + firewall rules
- **Data isolation:** Tenant-specific vector stores (RAG)
- **Agent guardrails:** RBAC + prompt-injection defense
- **Authentication:** JWT tokens + session management
- **Audit trail:** Immutable logging of all agent actions

3. AI Mentor Program

Accelerated learning track — 4 lessons/day (07:00, 11:00, 15:00, 19:00 MYT)

3.1 Curriculum Path

Phase 1Fundamentals (LLM basics, tool-use vs agents)✓ Done**Phase 2**Prompt engineering + chain-of-thoughtNow**Phase 3**Guardrails, RBAC, data isolationNext week**Phase 4**LangGraph + agent orchestrationTBD

3.2 Daily Learning Format

- 1 core concept (business explanation + PENSOLAR example)
- 1 practical test question (validates understanding)
- 1 real-world exercise (connects to your work)

- 1 gap identified + refinement path

3.3 Student Profile

Mastery Stage:2/9 (Foundations → Patterns)Strongest:Operational framing, systems thinkingWeakest:Prompt engineering precisionTesting:Tool-use vs agentic (pass) · Guardrails (pass) · Prompt injection (pending)

4. Go-To-Market Engine

Daily marketing briefs — Mon to Sat at 06:00 MYT

4.1 Target Personas

- **Manufacturing Ops Head** — reduce downtime, predictive maintenance
- **Retail Store Manager** — inventory forecasting, staffing optimization
- **F&B; Kitchen Manager** — food waste reduction, shift planning

4.2 Content Strategy

- **LinkedIn presence** — 3 posts/week (case-driven storytelling)
- **Lead magnets** — AI ops audit checklist, ROI calculator
- **SEO content** — 2 blogs/week targeting pain point keywords
- **Cold outreach** — 5 personalized messages/week to decision-makers

4.3 Channels

| Channel | Budget | Purpose |

|-----|-----|-----|

| LinkedIn | RM100/mo | Brand building + outreach |

| Google Ads | RM50/mo | Capture search traffic |

| Content | RM0 | SEO foundation |

5. Product Development Roadmap

90-day timeline from prototype to first paying client

5.1 Timeline Overview

Week	Deliverable	Key Activities	Success Metric
W1 (now)	Company + legal setup	SSM registration + domain + bank	SSM receipt + domain owned
W2	Landing page + MVP demo	Web copy + demo script v1	Landing page live + 3 scripts
W3	Agent engine + auth	RBAC system + data isolation demo	Auth working + secure sandbox
W4	First client outreach	Launch ads + cold messages to 50 targets	5 discovery calls booked
5-12	Iterate + scale engine	Feedback loops + performance tracking	3 paying clients + RM10K MRR

6. Autonomous Systems

5 crons running continuously — all pinned to tencent/hy3:free

Cron	Schedule (MYT)	Purpose	Output Location
mentor-ai-daily	07:00 / 11:00 / 15:00 / 19:00	AI education lessons	knowledge/mentor/
learn-pensolar	15:00 / 22:00	Solar industry intel	by_industry/solar_energy/pensolar/
marketing-advisor-daily	06:00 (Mon-Sat)	Marketing tactics	knowledge/marketing/
strategic-coo-guidance	Sundays 08:00	Strategy brief	knowledge/strategy/
workspace-cleanup-daily	10:00 nightly	Disk management	Deletes files >14 days

Key guarantees: All crons read-first (no duplication), compress-to-signal ($\leq 32\text{KB}$ SUMMARY cap), self-healing gaps, auto-append to INDEX.md. Drift-guard pinned to hy3:free — immune to model config changes.

6.1 Memory Discipline

- **SUMMARY.md** — living docs, rewritten not appended, capped at 32KB
- **RUN_LOG.md** — audit trail for traceability only
- **INDEX.md** — central map (tiny, always readable)
- **cleanup** — deletes daily files >14 days nightly

Document prepared by Hermes Agent — AI Co-pilot for OAKAI. Questions: engage directly.
